

Fortanium Advanced Materials Inc. : Fortanium Matériaux de Pointe Inc.

- ▲ Research and Development : experimental, applied and custom build
 - super alloys, metal mineral matrix
 - custom build foundry, pattern making, material casting
 - network for precision advanced casting, machining and infrastructure development
 - rapid prototype, custom build, limited and mass production

- ▲ General and Advanced Technology: retrofit, forward and reverse re-engineering
 - joint project vehicle development, retrofit upgrade, OEM, rebuild and redeploy
 - engines, transmission, gears, linkage, propulsion, vehicle structural dynamics
 - machinery, tools, tooling, equipment, components, parts, kinetic applications
 - textiles, passive and active, operating environment and counter-measures
 - surface, performance and properties engineering

- ▲ Integrated Continuum - associated technology and multi-dimensional aspects
 - multi-dimensional, phase, radio/electronic and misc. signal
 - optical, colour chromo-tech, light, particle wave physics
 - multi-magnetic and electro dynamic spectrum
 - thermo-dynamic and combustion physics
 - multi-physics, multi-phase and meta-physics technology continuum

- ▲ Industry - direct, independent, integrated, macro and micro component
 - aerospace, aviation, marine, automotive, industrial, national and civil defence
 - defence armour, multi dimensional stealth, industrial and individual applications
 - geo-materials, micro and monolithic super cast, polymer, ceramic
 - crypto metal mineral matrix, alloy, geo-material and crystal generation
 - environmental hazards, counter-measures, material processing, health and safety

- ▲ Project Management - logistics for materials, production, co-development
 - advance project development, production, assembly and optimization logistics
 - advanced materials and manufacturing, integrated design engineering technology
 - prime contract, co-development, OEM, proprietary, joint projects
 - national, geo and exo-political spectrum, possibility/probability theatre of operations
 - international, industrial, technology and intel scenario

- ▲ Options: Personnel, enterprise, client, trades, industry and investor
 - industry practice and unlimited creative imagination of individuals
 - working share owner personnel, intellectual property, capital, asset protection
 - develop, custom build, invest, save, transform
 - corporate entity investment and acquisitions, licensing, production agreements,
 - general and specific investment, development and acquisitions
 - comprehensive capital structure, optimized organization and investment options
 - conditional sales, acquisition and deployment

*due to national security reasons...freedom isn't free
strategic, tactical and operational advantage is essential*

awesome technology is enabled, augmented and amplified by creative imagination
Fortanium Advanced Materials Inc. - creative imagination creates reality
