Experimental, applied research and development and custom build:

- super alloys, metal mineral matrix
- custom build foundry, pattern making, material casting
- precision advanced casting, industry facilities, development and machining network
- rapid prototype, custom build, limited and mass production

General and Advanced Technology: retrofit, forward and reverse re-engineering

- joint project vehicle development, retrofit upgrade, OEM, rebuild and redeploy
- engines, transmission, gears, linkage, propulsion, vehicle structural dynamics
- machinery, tools, tooling, equipment, components, parts, kinetic applications
- textiles, passive and active, operating environment and counter-measures
- surface, performance and properties engineering

- aerospace, aviation, marine, automotive, industrial, national and civil defence
- defence armour, multi dimensional stealth, industrial and individual applications
- geo-materials, micro and monolithic super cast, polymer, ceramic
- crypto metal mineral matrix, alloy, geo-material and crystal generation
- environmental hazards, counter-measures, material processing, health and safety

Options: Personnel, customer, client, trades, industry and investor

- advance project development, production, assembly and optimization logistics
- advanced materials and manufacturing, integrated design engineering technology
- prime contract, co-development, OEM, proprietary, joint projects
- develop, custom build, invest, save, transform, conditional sales, acquisition and deployment
- corporate entity investment and acquisitions, licensing, production agreements,

Private Investment and Venture Capital Options
